

## Spring Is Almost Here Set Yourself Up For Success

As each day passes, the days are getting a little bit longer and a little bit brighter. Soon it will be time to get back out in that yard and start mowing and enjoying the yard you have worked so hard on. Here are a few practical tips of what you can be doing right now to set yourself up for success this spring.

- Service your lawn mowers/trimmers
- Have fresh mulch installed in your beds
- Clean up any lingering yard debris ie. sticks, branches and leaves
- Have a soils analysis performed
- Plan your weed prevention and fertilization schedule
- Schedule your Irrigation Spring Start Up

Following these tips will ensure that your lawn is looking it's best so you can spend less time working and more time enjoying your outdoor space.

## Now Is The Time To Mulch

It's not quite time to mow the lawn, but it is time to spread a nice fresh layer of mulch in your beds.

Mulch is about more than aesthetics, it provides a much needed level of moisture retention and insulation for soil.

As last years mulch begins to break down and add nutrients back into the soil, it's time to add a rich vibrant layer on top.

## How Does Your Garden Grow?

Raised bed vegetable gardens have skyrocketed in popularity recently. These planter boxes allow small spaces to be used to grow large quantities of fresh produce.

As convenient as these raised beds are, they still need to be properly watered to ensure your plants get the water they need to provide you with the bounty that you want.

There is an easy way to overcome that, add **drip irrigation** to your beds and let your irrigation system do the rest.

Whether you are looking to have new planter boxes installed, or if you need to add drip irrigation to your existing beds, Heritage Irrigation has the solution for you.
